

TECHNICAL DATA SHEET

Unbleached Paraffin Wax

DIAKO
PETRO TRADING

Unbleached paraffin wax is produced from petroleum raffinates and is available in various quality grades. It is widely used in candle manufacturing, surface coatings, and protective applications. Lower grades serve general industrial needs, while higher grades are preferred for specialized uses.

TYPICAL PROPERTIES	TEST METHOD	UNIT	VALUE
Color	ASTM D-1500	-	Max 4.5
Kinematic Viscosity @ 100°C	ASTM D-445	cSt	4.5 – 8
Melting Point	ASTM D87	°C	45 - 75
Oil Content	ASTM D-721	%wt	Max. 10

* Typical ranges are shown broadly to include all supply sources, but more precise specifications are also available. To obtain the specific ranges you require, please contact us at [info@diakopetrotrading.com].
